Education

1-06-2018 Metric Computer Science
26-05-2020 ICS Physics
Current BS Computer Science 6th Semester

Profile

Third-year Computer Science student being computer scientist. My passion for computer science and learning new technologies brought me to higher level platforms where I can learn computer science skills and science. Last couple of years I had learned a lot about programming fundamentals, OOP , DSA , DBMS, OS, AI C#.net etc along with basic android app development, Linux and Python development.

I have some projects such as B2B Manager, Point of Sale (Desktop App) and many Web Designs on my GitHub profile (github.com/naumanbutt2002).

Interests

- As I developed term projects in C#.net with MVC using MS Sql Server database so I'm interested in C#.net Applications to pursue my professional career.
- I have also interest in mobile apps and I want to start learning Flutter Framework with node.js backend in upcoming days.
- Moreover, as technology revolving rapidly, so I will start my final project in AI domain that is about LIDAR for auto-drive car and motion of robot and also aero-space in future.
